

AMBASSADORSHIP

WEDF

The World Ethical Data Forum

The World Ethical Data Forum brings together leading experts from around the world to bear upon the whole range of interrelated issues around the use and future of data and knowledge technologies. By encouraging the contact and collaboration of the seemingly competing worlds of technology, government, security, business, law, investment, academia, media, civil liberties and more, the World Ethical Data Forum is offering a crucial perspective for the navigation of the ethical implementation and development of technology.

From the methods and techniques that generate the granular data used by scientists, statisticians and developers, to the narratives of the media and governments which frame them, the Forum explores the opportunities and problems arising from the development of technologies that continue to open unprecedented possibilities for knowledge and influence.

WEDF aims:

- encourage discussion and collaboration in good faith across geographical, ideological, traditional, cultural, and institutional boundaries;
- develop conceptual tools essential to guiding ethical technological development, and thereby
- establish a 'moral imagination' adequate to our increasingly digital world.

How will you, as an Ambassador, contribute to WEDF?

Emphasizing collaborative effort by people and institutions of all perspectives, traditions, and cultures, WEDF is inviting students of the upcoming generation to join these crucial discussions through our WEDF Student Ambassador Program. As a Student Ambassador, you will support WEDF's aims and initiatives by contributing to the ongoing discussion and helping us raise awareness and tackle some of the world's biggest challenges.

What are the key parts of your role?

- Coordinate with universities and societies to organize discussions, talks & events
- Promote WEDF events and initiatives
- Opportunity to conduct research, write and publish content on our platform

What are the benefits?

- Networking opportunities with the extensive WEDF community.
- Position yourself at the forefront of discussions around innovations in knowledge technology and ethics
- Hands on working experience
- Enhance critical skills such as communication, networking, public speaking, professional writing.
- Opportunity to discuss your research goals and interests.
- Feedback on your work from professionals.
- Opportunity for mentorship with industry professionals and academics.
- Opportunity to join roundtable discussions
- Free access to WEDF events
