

Invitation to schools to celebrate the  
International Day of Mathematics 2022

[www.idm314.org](http://www.idm314.org)

One of the aims of the International Day of Mathematics (IDM) is to convey the love of mathematics to young people and the messages that mathematics is everywhere and that it is useful and beautiful. The theme chosen for IDM 2022 is:

*Mathematics Unites*

Teachers are invited to celebrate in their classroom. Schools can also organize larger events. Here are suggestions:

- Discuss the *Mathematics Unites* theme and what it could mean.
- One way *Mathematics Unites* is that *There is a universal mathematical language*. As an illustration, you can use the *Proofs without words* in our section proposing [classroom activities](#).
- Register that your school is celebrating on the [IDM website](#) so that it appears on the IDM event map 2022.
- The [logo](#) already exists in 23 languages and more will be added as and when requested.
- You can use the IDM 2022 poster (to appear soon) or produce your own with your students.
- Participate to the live coverage of March 14 (similar to <https://www.idm314.org/launch-2021.html>),
- Visit the [IDM website](#) and share photos or videos of your activities on the site and on social networks.
- If you wish to organize an event outside the classroom you can use the material proposed on the website in several languages: <https://www.idm314.org/organize.html>,
- Subscribe to the IDM newsletter to receive all the information in the run-up to IDM 2022: <https://www.idm314.org/about.html>. In particular, you will learn of our participative activity to be announced soon.

**All schools around the world are invited to celebrate!**
